

## Title

O Series - Tax Journal Export Request

## Issue

Outlines the process and requirements for submitting a Tax Journal Export request from a client

## Environment

## Details/Resolution

### Process:

Client Requests a Tax Journal Export

### Prerequisites

Can only be scheduled during business hours 7a-7p, 8a-8p or 9a-9p (12 hour window max per day).

Cannot be run more often than every 2 hours.

Cannot be scheduled for more than 30 days.

If multiple partitions are being requested, schedule the start times 15 minutes apart for each partition. Only one TJE can run at a time so they need to be scheduled at different times.

Tax Journal Purge will not be run since a Purge is already scheduled to run daily.

NOTE: Use the TJE\_Requirements Salesforce template to quickly send these requirements out to customers.

### Request to Production Support:

After receiving acknowledgment of the above, tech lead approval, and the desired date and frequency for the Tax Journal Export schedule, a request to Production Support will be needed.

In the Salesforce Case, go to the Requests tab, select “Yes” to Quick Hit and “On-Demand” as the deployment type.

You will then need to enter a subject for the request (Ex: Tax Journal Export Request for ‘Company Name Here’)

In the Information section, include what has been requested, when it’s being requested for, who requested it, the URL of the instance for the request, and why it has been requested if it falls outside standard guidelines.
